SEALING OF IRON-DUST CORES AND TRIMMERS

Note: This issue, Page 1, supersedes Page 1, of Issue 1, dated 3 Jul. 1945. It has been amended because of changes in designation.

1. Information (and subsequent action) for R.E.M.E. field and base workshop units.
2. To facilitate the adjustment of iron-dust cores and trimmers the following new materials have been provided:-
 - (a) Wax, sealing, iron-dust cores (Y3/YC 00600), to be used to seal iron-dust cores subsequent to their adjustment. This wax must be used sparingly.
 - (b) Compound, sealing, nitro-cellulose (WB 3621), to be used for the sealing of trimmers subsequent to their adjustment.
3. The A.Fs. G 1098 covering workshops which normally include telecommunications units have been amended to include quantities of these materials. Further requirements may be met by demanding through the normal Ordnance channels.

Incl. 2 to 57/R.E.M.E./21
